

Distr.: General 9 April 2008

Original: English

**Fourteenth session** Kingston, Jamaica 26 May-6 June 2008

# Election to fill a vacancy on the Legal and Technical Commission in accordance with Part XI, section 4, subsection C, article 163, paragraph 7, of the United Nations Convention on the Law of the Sea

### Note by the Secretary-General

1. The Council is invited to note that Michael Wiedicke-Hombach (Germany), member of the Legal and Technical Commission, has resigned. Mr. Wiedicke-Hombach was elected a member of the Commission on 14 August 2006 (see ISBA/12/C/11), for a term of five years beginning 1 January 2007.

2. In accordance with article 163, paragraph 7, of the United Nations Convention on the Law of the Sea and rule 80, paragraph 3, of the Rules of Procedure of the Council of the International Seabed Authority, in the event of the death, incapacity or resignation of a member of the Commission prior to the expiration of his or her term of office, the Council shall elect for the remainder of the term a member from the same geographical region or area of interest.

3. Article 163, paragraph 3, of the Convention and rule 81 of the Rules of Procedure of the Council provide that members of the Commission shall have appropriate qualifications in the area of competence of the Commission, and States parties shall nominate candidates of the highest standards of competence and integrity with qualifications in the relevant fields so as to ensure the effective exercise of the functions of the Commission.

4. By a letter dated 8 April 2008, the Permanent Mission of Germany to the Authority informed the secretariat of the Authority of the nomination of Christian Reichert, head of the Geophysical subdivision of the Federal Institute for Geosciences and Natural Resources, as a candidate to fill the vacant seat on the Commission. The curriculum vitae of Dr. Reichert appears in the annex to the present document.

08-30132 (E) 180408 \*0830132\*

## Annex

**Curriculum vitae**<sup>a</sup>

# Christian Jürgen Reichert (Germany)

Name: Civen names: Marital status: Date of birth; Place of birth; Nationality; Present position;	Dr. Reichert       Affliation: Bundesanstalt für         Christian Jürgen       Geowissenschaften         married       und Rohstoffe (BGR)         12 April 1951       Sulleweg 2         Berlin, Germany       D-30655 Hannover         German       Tel. ++49-511-649-3244         Sub-Division Mdadt       Fax: 1+49-511-649-3063         Geophysical       e-mail: christian.reichart@bgrde         Research       web-site: www.bgr.bund.de
(or (G	Tof sub-division "Geophysical Research" with the Federal Institute eosciences and Natural Resources (BGR) Management of the running tasks of the sub-division (staff of ap- proximately 70 scientists and technicians), staff and budget plan- ning. This includes Marine Geophysics with comprehensive in- strumentation for operations world-w de (reflection and refraction seeismics, magnetics, gravity, geothermics), an airborne technical service with a helicopter completely litted with electromagnetics, magnetics, radiometry (airborne gravity and airborne radar under development), the German Seismological Central Observatory in Erlangen, the National Data Center fulfilling the German tasks within the frame of the Comprehensive Test Ban Treaty (CTBT) of the United Nations (UN) with its seismic and Infrasound monitoring stations, as well as Applied Geophysics with various electromag- netic methods, gravity and geothermics.
•	Deputy Division Head (B3: Geophysics, Marine and Polar Re- search) with approximately 140 scientists and technicians).
•	Conception and implementation of and cooperation in interdiscipli- nary research projects in the marine sector (generally of interna- tional character), application for third party funds (e.g. Federal Min- lstry of Education and Research: marine research with RV SONNE). As in the earlier position, the principle tasks are contribu- tions to assessing the potential in natural resources and the geo- risk potential of selected active and passive continental margins. This includes the study of basic geological-tectonic processes ac- tive during continental margin formation.
•	Conception and implementation of third party funded projects as well as cooperation with private industry companies.

CV Dr. Christian Reichert, as of December 2007

page 1 of 7

<sup>&</sup>lt;sup>a</sup> Reproduced in the original language of submission.

- Until March 2007 coordinator for the subject "Investigation of the Seas and Polar Regions" within the Development and Research Board of BGR.
- Scientific issues within the frame of implementing Article 76 of the United Nations Convention on the Law of the Sea (delineation of the limits of the continental shelf), German candidate for the elections to the UN Commission on the Limits of the Continental Shelf in June 2007.
- Project-Controlling for the division "Ceophysics, Marine and Polar Research".
- Chief-scientist on four marine-geoscientific expeditions with scientilic staff of ca. 18 persons for investigations on the continental margins off Costa Rica, Tasmanla, Chile and Mozambique.

1993 - 1999

Head of Sub-Division "Marine Geophysics, Polar Research" with the Federal Institute for Geosciences and Natural Resources (BGR).

- Management of the running tasks of the sub-division (staff of approximately 50 scientists and technicians), staff and budget planning including the geological-geophysical expeditions to the arctic and Antarctic regions. The latter are realized about bi-annually, and are of high logistical complexity and costs. They involve intense cooperation with other national and international research groups. (polar budget comprises approximately. 2.2 Mio Euro per fiscal year).
- Conception and Implementation of, as well as participation in interdisciplinary research projects in the marine and polar sector sector, application for third party funds (e.g. Faderal Ministry of Education and Research: marine research with FV SONNE). Principle tasks are contributions to assessing the potential in natural resources and the geo-risk potential of selected active and passive continental margins. This includes the study of basic geological-tectonic processes active during continental margin formation.
- Co-ordinator for the working field "Gecrisk" within the Research Board of BGR.
- Chief-scientist on five marine-geoscientific expeditions with scientific staff of ca. 18 persons for investigations of the continental margins of East Siberia (Arctic Ocean), Chile, Queen Maud Land (Antarotica), Namibia, Indonesia as well as of the oceanic crust of the Angola Basin. Co-Chief Scientist on two other expeditions: Arabian Sea and Indian Ocean (Ninetyeast Ricige).

1992 - 1993

Scientific employee with the Geological Survey of Lower Saxony (NLfB): Acquisition, processing and interpretation of shallow-seismic data.

CV Dr. Christian Reichert, as of December 2007

TIA Sel Cor Ge LAI	ctorate thesis: 'En geophysikalischer Beitrag zur Erkundung der fenstruktur des Nordwestdeutschen Beckens längs des refraktions- smischen Profils NORDDEUTSCHLAND 1975/76' (A geophysical thibution to the investigation of the desp. structure of the Northwest man Basin along the seismic refraction profile NORDDEUTSCH- ND 1975/76) with focus on seismic and gravimetric methods and delling.
gra DE pro var but	neger assistant for the German Continental Seismic Reflection Pro- mme (Deutsches Kontinentales Reflectionssetsmisches Programm, KORP) with the NLBS Management or comprehensive geo-scientific lects for investigation of the deep Earth's crust in Germany using ous methods with focus on the seism c reflection method. Total get approximately ca. 2 Mic. Euro per year, one scientist, one unician, own seismic reflection equipment and operation.
•	Conception, organisation, realization and evaluation of the particu- lar sub-projects, incl. call for tenders, commissioning contractors for the main field work and supervision of implementation,
•	Organisation of annual status workshops as well as of an interna- tional symposium ("Deep Seismic Profiling of the Continental Lithosphere", Bayreuth, 1990) with about 200 participants,
•	Presentation of the results on national and international confer- ences and meetings as well as by publications,
•	Collaboration with national and international research groups and industry.
	entific employee with the Geological Survey of Lower Saxonr (Nie- sachsisches Landesamt für Bodenforschung, NLTB), Hannover
•	Acquisition, processing and interpretation of seismic refraction data,
•	Geothermics,
•	Data processing for <sup>14</sup> C age dating.
	le Universität Berlin (Free University of Berlin): Regular studies in physics along with geology and geodesy.
1	Diploma thesis: "Entwicklung und Erprobung eines Programmsys- ems zur digitalen Bearbeltung refraktionsseismischen Datenmateri- als" (Development and testing of a programme system for digital processing of seismic refraction data).
• (	Comprehensive field work in European countries and Brazil for in- vestigations on structures of the deeper Earth,
1957 - 1970 🔗 🔅 Pril	nary and Secondary School (Gymnesium) in Berlin.
